Client Assessment Report

Static Caravan / Holiday Park Claim Review

Client Kennedy Vaughan / Nicola Vaughan 1 Forder Grove Birmingham West Midlands B14 5JN	**Prepared for** Initial claim assessment and evidence review Date prepared: 4 July 2026 Matter: Haven / Hopton static caravan dispute

Important status note: This assessment is preliminary and based on the PDF report and client-provided material. It is advice and does not guarantee recovery. Values, findings and potential legal routes should be checked against the original contracts, SAR workbook, finance agreements, invoices, complaint correspondence, snagging evidence and any legal-partner review before formal action.

Client Information Matrix

Field	Information
Client Name	Kennedy Vaughan / Nicola Vaughan
Address	1 Forder Grove, Birmingham, West Midlands, B14 5JN
Telephone	Haven/SAR records show telephone entries ending 7772237667 and later 7547917159. Current preferred number 07772428217
Emails	nicolaemmavaughan@icloud.com; cliffordcox@blueyonder.co.uk; kennedy.vaughan@aseeltd.com; ken@volgainvestmentltd.com
Product / Matter	Static caravan / holiday park ownership dispute
Supplier / Park Operator	Haven Holidays Ltd / Hopton Holiday Village
Park	Hopton Holiday Village, Great Yarmouth, Norfolk, NR31 9BW
Account / Plot	Haven account HO055639; plot 31 confirmed by insurance schedule; complaint refers to pitch 31 Shorfield
Caravan Details	Insurance schedule lists make Regal, model Symphony; structure and contents value shown as GBP 85,000
Current Status	Historic complaint, termination and disputed financial losses. Legal review required for limitation, liability and recoverability.

Executive Summary

The uploaded PDF report sets out an updated preliminary assessment for Kennedy Vaughan and Nicola Vaughan in relation to a Haven / Hopton static caravan dispute. The evidence reviewed includes a client bundle, SAR material, an insurance schedule, complaint material and newer focused client statements. The file now contains documentary support for the Hopton account, the park, plot number, caravan make/model, complaint history, finance involvement and several payment/account entries.

The core complaint is that Mr and Mrs Vaughan purchased and then upgraded a static caravan at Haven Hopton after relying on assurances that identified defects and snagging would be resolved. The PDF states that the client complaint describes an older three-bedroom replacement caravan, pitch 31 Shorfield, and an alleged assurance that snags would be sorted within approximately three weeks.

The complaint narrative states that more than 80 snags were listed, that many remained unresolved across two seasons, that the caravan was not fit for purpose, and that the family lost the practical enjoyment of the caravan during a period when their son was seriously ill. Haven/SAR records reportedly show a complaint created on 30 July 2018 and later reopening/closure activity in November 2019.

Preliminary claim strength: Potentially strong on factual background, reliance, complaint history and snagging evidence, subject to legal review. The main risks are limitation, contractual exclusions, exact proof of representations, precise loss calculation, finance-settlement evidence, and whether the strongest recoverable route lies against Haven, the finance provider, or both.

Background & Chronology

Date / Stage	Event / Relevance
28 Sep 2016	Haven/SAR record created for Mrs Nicola Vaughan at 1 Forder Grove, Birmingham.
14 Apr 2017	Sales/contact notes record Mr Vaughan looking to purchase, with family circumstances and finance discussion noted.
29 Apr 2017	Hopton appointment recorded as made and kept.
1 May 2017	Haven records show sale activity and card payments of GBP 3,000 and GBP 2,000.
20 May 2017	Finance/deposit entries for sale HO00B8BE: Evergreen Finance Ltd agreement 12022154, finance GBP 33,750, deposit GBP 5,000 and GBP 7,500 due later.
30/31 May 2017	Records show BACS payment GBP 7,500 and finance received GBP 33,750.
2017 ownership period	Client complaint says the first purchase was approximately GBP 48,000 and was initially satisfactory but too small for family needs.
May/June 2018	Upgrade/sale records show finance entries around GBP 29,000 and a GBP 2,000 card payment. Complaint letter states the second upgrade was approximately GBP 61,000.
30 Jul 2018	Haven/SAR records show complaint created/received and emails acknowledged. Complaint subject: owner part-exchange June 2018, many snagging issues not resolved, alleged breach and not fit for purpose.
2018 season	Client says more than 80 snags were listed and many remained unresolved, causing the family to stay away while full site fees and bills were paid.
7 Feb 2019	Haven/SAR records show GBP 4,000 credit card payment received. Client says this was paid while withholding the balance until snags were completed.
1 Aug 2019	Haven/SAR records contain termination letter for overdue balance GBP 4,657.15 and letter to Evergreen Finance confirming termination and storage/removal position.
12-26 Nov 2019	SAR records show complaint closure activity, finance company payment of GBP 26,220.83 and reference to rent ledger balance/refund on owner leaving park form.
2025/2026	Later SAR/disclosure activity indicates subject access and delayed disclosure concerns already captured in prior

Date / Stage	Event / Relevance
	material.

Technical Findings Analysis

For this matter, the technical focus is the condition, usability and quality of the static caravan rather than building fabric or mortgageability. The report identifies a significant snagging complaint: the latest documents refer to approximately 71 snagging defects/items, while the complaint narrative refers to more than 80 snags and many remaining unresolved over two seasons.

- The replacement caravan was allegedly expected to be ready to an acceptable standard before handover or shortly thereafter.
- The client states that identified snagging works were to be completed before occupation or within a reasonable period, with an alleged three-week assurance.
- The client states that approximately 48 defects remained outstanding when the caravan was ultimately removed and/or more than 60% remained unresolved when belongings were removed.
- The snagging issue should be evidenced by the itemised snagging list, photographs, repair logs, engineer attendance records and any Haven internal notes.

Technical evidence priority: The strongest presentation will require the itemised snagging schedule, photographs, dated repair requests, attendance notes and any handover documentation showing what was promised and what remained unresolved.

Finance / Ownership / Value Analysis

The PDF report indicates that finance-linked records are now confirmed through SAR material, including Evergreen Finance Ltd agreement references 12022154 and 12022646. This is important because it may affect the potential route of recovery, the parties to be approached, and any linked finance liability arguments. The full finance agreements and settlement statements remain essential.

There are also ownership-value issues arising from the first caravan purchase, the subsequent part-exchange or value returned, the second upgrade, the termination, and the final leaving-park/refund position. The complaint states the first purchase was approximately GBP 48,000 and the second upgrade approximately GBP 61,000. A separate allegation concerns decking/veranda expenditure of over GBP 10,000 and whether ownership/removal was properly dealt with.

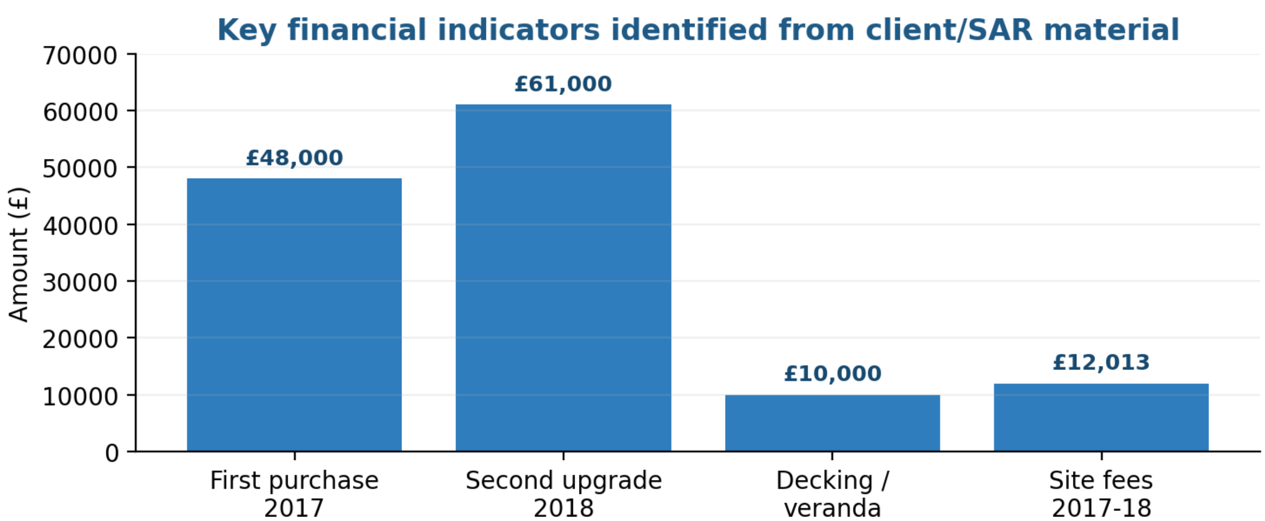
- Was the second upgrade induced by unresolved suitability or size issues from the first purchase?
- What precise part-exchange allowance or credit was given against the first caravan?
- Did Haven or any finance provider receive payment after termination, refund, disposal or repossession?
- Can the final net loss be calculated from the owner leaving park form, ledger, settlement statement and refund/cheque records?
- Does the limitation position require arguments based on knowledge, concealment, complaint handling or delayed disclosure?

Financial Exposure

The figures below are extracted from the uploaded PDF report and should be treated as working indicators only. They should not be double-counted until contracts, invoices, ledger entries, finance statements and final account/refund documents are reconciled.

Loss / Figure	Amount	Evidence / Status
First caravan purchase	Approx. GBP 48,000	Stated in client complaint; contract/invoice confirmation required.

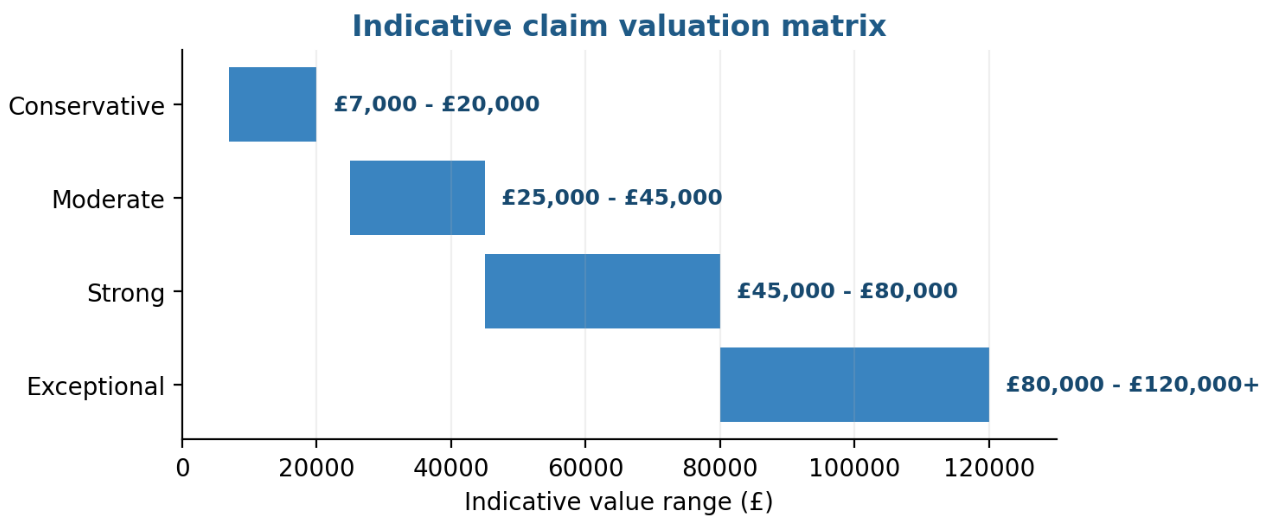
Loss / Figure	Amount	Evidence / Status
Part exchange / value returned	Approx. GBP 29,000 returned	Client says this left a perceived loss of nearly GBP 20,000 and tied them into an upgrade.
Second upgrade	Approx. GBP 61,000	Client complaint states this was for the older three-bedroom replacement caravan.
2017 sale / finance entries	GBP 3,000 + GBP 2,000 card payments; GBP 5,000 deposit; GBP 33,750 finance; GBP 7,500 due later	Recorded in SAR/sale schedule, but final treatment requires finance/contract review.
Further SAR-backed charges	GBP 6,331.62 card payment; annual site fees GBP 5,863; insurance, electricity, gas, rates and water/sewerage entries	Working ledger figures to be reconciled.
Site fees / bills	Over GBP 7,000 claimed; SAR entries show annual site fees GBP 5,863 in 2017 and GBP 6,150 in 2018	Potential loss of use/benefit where caravan was allegedly not fit for purpose.
2019 payment	GBP 4,000	Client says paid while withholding balance until snags completed; SAR records card payment on 7 Feb 2019.
Overdue balance / termination	GBP 4,657.15	Termination letter in SAR records shows overdue balance on 1 Aug 2019.
Disconnection fee	GBP 160 claimed / GBP 139.34 ledger entry	Difference to be reconciled.
Decking / veranda	Over GBP 10,000 claimed	Invoice, ownership terms and removal/disposal evidence required.
Finance settlement	GBP 26,220.83 finance company payment recorded	Full finance settlement statement required.
Refund / leaving park	GBP 4,503.91 rent ledger balance referenced	Owner leaving park form and cheque/refund detail required.



Valuation Matrix

The following valuation matrix is indicative only. It is not a guaranteed outcome and should is not presented to the client as a promised recovery figure. The final case value will depend on limitation advice, contractual documents, the finance position, proof of reliance, the snagging evidence, whether losses are recoverable in law, and the final net account after refunds/disposal are reconciled.

Scenario	Indicative Value	Rationale
Conservative	GBP 7,000 - GBP 20,000	Focused recovery of evidenced site fees, loss-of-use elements, discrete charges, disconnection/administration items and modest inconvenience where legally recoverable.
Moderate	GBP 25,000 - GBP 45,000	Applies if contracts and SAR ledger support a wider financial loss, including part-exchange disadvantage, finance costs, site fees and substantial loss of use.
Strong	GBP 45,000 - GBP 80,000	Applies if legal review confirms strong misrepresentation/fitness grounds, poor complaint handling, finance-linked liability and a supported loss schedule.
Exceptional	GBP 80,000 - GBP 120,000+	Only if the full purchase/upgrade losses, finance consequences, decking/veranda dispute, unresolved snagging and final account position are all evidenced and recoverable.



Evidence Required

The claim should be progressed only after a focused evidence pack is obtained. The objective is to prove what was sold, what was promised, what was relied upon, what defects existed, what remained unresolved, and how the final financial loss is calculated.

1. Full contract pack for both purchases/upgrades, including sale terms, warranties, handover documents and any exclusions.
2. Full Evergreen Finance agreements 12022154 and 12022646, together with settlement statements and payment history.
3. Sales invoices, part-exchange documents and evidence of the first caravan valuation / credit allowance.
4. The detailed itemised snagging list, photographs, repair records, engineer attendance notes and any exhibit references.
5. Written evidence of any assurance that defects would be completed within three weeks, before occupation or within a reasonable period.
6. Haven complaint correspondence, acknowledgements, internal notes disclosed through SAR and closure/reopening records.
7. Owner leaving park form, final account, refund/cheque details and ledger explaining the GBP 4,503.91 balance.

8. Decking/veranda invoice, ownership terms and any evidence dealing with removal, retention or loss of the decking.
9. Insurance schedule, park account documents, payment receipts, site fee bills, utilities, rates and disconnection charge evidence.
10. Relevant medical/family impact evidence only if distress/loss of enjoyment is to be advanced and legal partner confirms recoverability.
11. Legal limitation review, including whether knowledge, complaint handling, disclosure or concealment arguments may assist.

Preliminary Assessment

On the information currently available, the matter appears to be a potentially strong holiday park/static caravan complaint subject to legal review. The factual narrative is more developed than many early-stage cases because the PDF report identifies SAR-backed account information, finance references, complaint dates, ledger entries, insurance details and focused statements on reliance, promises and human impact.

The strongest themes are misrepresentation/reliance, consumer quality or fitness, failure to repair within a reasonable time, complaint handling, finance-linked consequences and Haven's alleged knowledge of the family circumstances. The main vulnerability is that the key events are historic; limitation must be reviewed before any formal legal route is pursued.

Assessment Factor	Preliminary Position
Misrepresentation / Reliance	Potentially strong if evidence confirms the three-week or prompt-repair assurance and that the client reasonably relied on it when proceeding.
Consumer Quality / Fitness	Potentially strong if itemised snagging evidence confirms extensive defects and continued unresolved issues.
Failure to Repair	Potentially strong if repair logs show repeated opportunities to resolve defects without satisfactory completion.
Complaint Handling	Supportive if SAR records confirm complaint creation, acknowledgement, reopening and closure without adequate response.
Finance-linked Route	Potentially important because Evergreen Finance agreements are identified, but the finance documentation must be reviewed.
Loss Evidence	Partially evidenced. Several figures are identified, but the final schedule must avoid double counting and reconcile refunds, finance settlement and termination entries.
Limitation	Key risk. Legal partner review is essential before formal proceedings or final claim valuation.
Overall View	Good candidate for structured evidence pack preparation and legal-partner review.

Recommendations & Next Steps

- Confirm whether the primary claimant should be Mr Kennedy Vaughan, Mrs Nicola Vaughan, or both.
- Obtain and index the full first and second purchase agreements, finance agreements, sales invoices, part-exchange documents and owner leaving park form.
- Create a final reconciled Schedule of Loss using SAR ledger entries, complaint figures, finance settlement, refund/cheque details, decking cost, site fees and utilities.
- Prepare a clean exhibit index covering contract documents, SAR workbook extracts, complaint letter, insurance schedule, snagging list, photographs, ledger entries and termination letters.
- Separate factual witness evidence from documentary evidence so that each alleged promise, defect, payment and loss can be traced to a document or witness statement.

- Refer the completed evidence pack to a legal partner for limitation, liability, recoverability and finance-route advice before sending a formal letter of claim.
- Only after legal review, prepare a formal complaint/letter of claim focused on reliance, unfulfilled snagging assurances, loss of use, finance consequences and final account loss.

Specialised Holiday Park Assessment Points

- Site fee analysis: compare annual site fees and bills against periods when the caravan was allegedly unusable or not fit for purpose.
- Buy-back / exit analysis: review owner leaving park form, termination documents, refund records and any valuation/part-exchange terms.
- Rental/loss-of-use analysis: evidence should distinguish actual paid bookings/refunds from general loss of enjoyment.
- Snagging analysis: prepare a defect-by-defect schedule showing item, date reported, evidence, Haven response, completion status and loss consequence.
- Finance analysis: review whether finance agreements create a direct route or supporting route for recovery and whether any payment/refund sequence affects quantum.

Conclusion

This assessment identifies a potentially strong static caravan / holiday park complaint, but the case should not be treated as complete. The strongest immediate step is to convert the PDF/SAR material into an exhibit-indexed evidence pack, reconcile the loss schedule, and obtain legal-partner advice on limitation, liability and recoverability. The best presentation is likely to focus on reliance on Haven’s assurances, unresolved snagging, loss of use, finance-linked consequences, complaint handling and the final account/refund position.
